Logistics Management

Customer

Complete logistics solution provider for a wide range of businesses - small businesses, Fortune 100 and Fortune 500 companies. Also provides warehousing services for goods and merchandise.
Customer need

They wanted a complete time & attendance solution that included a smooth process to track the employee's check-in and out via QR codes. In addition to time tracking, they wanted to export the employee's service hours every day into their ADP payroll system to streamline their payroll process.

New workflow with allGeo

With allGeo's time & attendance tracking, they were able to automate and streamline many aspects of their workflow. Their workflow started with setting up allGeo generated QR codes at their offices and warehouses to track employee check-ins and check-outs as employees scanned QR codes at job sites with their smartphones. All this time tracking data is now available to managers with useful reports that show:

- Time clock punches and their locations of the entire day, miles between those punches, and notes or messages captured during that punch.

- All the information/data gathered in the field through QR scans, notes, images, etc.

The second part of the workflow is to export the time & attendance data directly into their ADP payroll system. This happens through allGeo's API integration with ADP Workforce Now.® The data is sent from allGeo to ADP with just one click, making their payroll process much more efficient.
